I currently connect businesses across both the USA (and the world) with Premium SEO Services on behalf of WPAmplify. I live in Pattaya City, Thailand, and my business partners reside in Montvale, New Jersey & Cape Coral, Florida. I have more than 20 years of experience working as an IT professional (Microsoft, Linux, Novell, & Cisco) all in Silicon Valley. I also once worked with Steve Job's niece. I have also worked for over eight years as a professional business website designer, SEO, & Internet Marketing Specialist. I have built business class websites since 2007 - projects big and small - in Northern Virginia, Washington DC, Maryland, and in the Tampa Bay Area of Florida. I am a business trained expert in all phases of business website design, graphic design, photo sliders/galleries, logo design, PHP and HTML coding, website development, and especially Wordpress website design. I am an expert at on and off-page SEO strategies. I am also an expert with Google Adwords, Facebook Marketing, Yelp Marketing, & more. I have a degree in Internet Marketing. Today I support one of America's leading SEO professionals, Mr. Ryan Cote of WPAmplify. Mr. Ryan Cote is one of the most talented SEO professionals I have ever had the opportunity of working with. His customer satisfaction level and his client retention rate are five (5) star in terms of overall quality and professionalism.
